

# Wetlands

## Comprehensive Assessments And Reporting No Matter Your Needs

Tannas Conservation Services Ltd

### FIELD ASSESSMENTS

---

**Alberta Wetland Policy:** *ABWRET-A form, Wetland Mapping, and All Associated Assessments*

---

**Classification of Wetlands:** *Stewart and Kantrud, Alberta Wetland Classification System, Canadian Wetland Classification System, and Cowardin*

---

**Riparian Health Assessments:** *Lotic Health Assessments, Lentic Health Assessments, and Associated Analysis*

---

**Complete Biophysical Assessments:** *Wildlife Surveys, Vegetation Inventories, Rare Species Surveys, Habitat Assessments, and Aquatic Surveys*

---

### REPORTING AND ANALYSIS

---

**Wetland Compensation:** *Classification, Wetland Reports, Permanency Mapping, Regulatory Submissions, and All Related Support through the Application Process*

---

**Ecosystem Planning and Management:** *Biophysical Reporting, Health Assessments, Mitigation Planning, and Comprehensive Management Plans*

---

**Wetland Restoration:** *Planting Plans, Seed Mixes, Comprehensive Restoration Plans, Construction Management, and Monitoring*

---

## Projects

*Our history of assessing and managing natural ecosystems extends across uplands and wetlands. We have completed numerous wetland assessments with accompanying reporting and analysis. Our strengths in botany, soils, and ecology allows us to assess each wetland in detail and provide our clients with the highest quality reports, management plans, and regulatory support to suit their specific needs. Our history of growing native plants has allowed us to put into place high quality and successful ecological restoration plans across western Canada. With thousands of wetlands assessed, we have the experience no matter the project needs.*

### Forest Lawn Wetlands, Calgary AB

Personnel have been working with the Forest Lawn property for the past 4 years. The work started with providing all the field assessments for the BIA and has progressed as the development plans have proceeded. In 2015, 67 wetlands were taken through the new Alberta Wetland Policy for Compensation with the final Applications to be completed in 2016.

### Stettler Water Supply Pipeline

Personnel completed all field assessments and reporting for over 200 wetlands assessed within the 40 km pathway of the pipeline right of way. A complete construction and reclamation plan was provided and the project included assessment of rare plant biodiversity and the final assessment of each wetland.

## Experience

Over 20 years' experience assessing wetlands across western Canada.

Assessment and associated reporting for pipelines encompassing over 100 km and over 300 wetlands with all supporting reports and mitigation plans.

Riparian health assessments, browse assessments, reporting, and management plan creation for wetlands in three National Parks and numerous public and private properties across western Canada.

Wetland Compensation reports and BIA's on numerous wetlands for urban development with associated field work, reporting, and regulatory applications.

Completed hundreds of wetlands assessments and classifications for oil sands projects across Northern Alberta.

## The Tannas Conservation Services Advantage

Based throughout Alberta, Tannas Conservation Services has extensive experience working across western Canada. Within the hundreds of projects we have completed we have surveyed over 2 million hectares of land in western Canada from the Arctic Ocean to the USA border. Our highly trained and experienced team integrates office and field work allowing the specialist writing the report to be the same person who has been on the ground. This ensures we provide each client with the best quality product.
